

Paediatric First Aid

Every year in the UK thousands of people die or are seriously injured in accidents. Many of these deaths could be prevented if first aid is given before the emergency services arrive.

Course Overview

This two-day paediatric first aid course focuses on emergency scenarios that face those looking after young children and infants, including day nurseries, private nursery schools, pre-schools, before and after school clubs for children in the early year's age group, child minders and carers of children at home.

The course teaches skills for responding to accidents and how to recognise and treat certain medical conditions in babies and children.

This course is recognised by Ofsted for the Early Years Foundation Stage Framework.
